STRETCH-FIT™: a nova correia elástica da Gates.
Tão completa que você compra a correia e leva todo o kit.

A LINHA STRETCH-FIT™ é a única que vem com ferramenta universal de instalação e instruções completas na embalagem. Somente para veículos que dispensam o uso de tensionador. Consulte sempre o manual do veículo.

Aviso importante

Os novos motores utilizados nos veículos estão trabalhando com temperaturas cada vez mais elevadas, isto decorre da utilização de maiores taxas de compressão, bem como pelo processo de combustão cada vez mais otimizado.

Isto resulta em um maior regime de giro e potência aumentando ainda mais a solicitação das correias.

Por este motivo tanto as montadoras brasileiras quanto as estrangeiras utilizam somente correias em "HNBR".

"HNBR" é um elastômero de última geração resistente a calor, ozônio, lubrificantes e com extrema resistência à fadiga.

Atenção: ainda que as peças em cloropreno possuam o mesmo número de dentes, mesmo passo e mesma largura, ou seja, apresentem montagem no conjunto, estas não devem ser montadas sob risco de quebra prematura caracterizada por aplicação incorreta.

A tabela abaixo mostra os casos de aplicações em cloropreno e HNBR bem como a limitação de ano de aplicação para as correias em cloropreno.

A Gates informa que a aplicação de correias em cloropreno nos veículos fabricados após o ano de 1995 [confira a tabela abaixo], ocasionará quebras prematuras das mesmas, gerando um enorme prejuízo ao usuário/aplicador, uma vez que esta ocorrência não será coberta pela garantia.
